

## Data Transfer

When transferring data we kindly ask you to observe the following criteria:

- **Generally we prefer data transfer and delivery of PDF-files.**  
PDF-Files need to be created at least in version 1.5 (Acrobat 6). Please also make sure that PDF-files are written with layers. Normalized PDF-/GRS-files from ESKO workflows are also acceptable.
- Every **data transfer** must contain precise information about customer and job: Customer name and job name need to be clearly visible within the data transferred, especially concerning data from third parties.
- **Resolution:** at least 300 dpi (not coarser!); picture data M 1:1
- **Color mode** of pictures: special inks or CYMK as **PSD-files** (with layers, if applicable)
- **Fonts:** convert to character paths, embed in PDF-file, or deliver complete font files.  
Please always deliver font files for **paragraph text**.
- **Logos, line drawings:** always send as vector graphics (not pixel based).
- **Other graphic files:** deliver with complete postscript fonts. Concerning **embedded EPS- and TIFF-files** please also include the original output files from the creating application as well as all used fonts.
- When delivering other graphic files please make sure to **always** include a pure layout file ("view PDF").
- CorelDraw files: please always export as PDF files.

We can handle data from the following applications/ minimum versions (Macintosh):

### **Macintosh :**

Art Pro 12  
Illustrator CC 2014  
InDesign CC 2014  
Photoshop CC 2014  
Automation Engine (Esko) 12.2.0

### **Cutting dies**

can be delivered in dxf, cf2, and ard file formats

### **Data storage media**

We can handle CDs, DVDs, and USB memory sticks

## Data transfer

e-mail: **av@jaehde.de**  
Internet: **www.jaehde.de**  
FTP-Server: on request
